

Request for Proposal - Industrial Coating Services

Date: October 25, 2024

Company: Apex Manufacturing Solutions

Attention: Vendor Partners

Overview:

Apex Manufacturing Solution is seeking a qualified supplier for high-performance industrial coatings.

We specialize in heavy machinery and automotive component manufacturing.

Our upcoming project requires a reliable coating solution that ensures durability and safety under extreme conditions.

We are looking for a partner who can provide a product that meets our specific technical requirements

and can deliver within a tight timeline.

This RFP outlines our needs. Please review the technical specifications on the following page.

Request for Proposal - Industrial Coating Services

Technical Requirements & Commercial Terms

1. Temperature Resistance:

The coating must be able to withstand temperatures of at least 200 degrees Celsius without degrading.

This is critical for our heat-treating process.

2. Viscosity and Application:

We require a viscosity of approximately 90-95 KU (Krebs Units) or similar standard to ensure proper flow

during our automated spray application. Ease of application is key.

3. Industry Suitability:

The product should be suitable for automotive and high-stress industrial environments.

Resistance to oil and chemicals is a plus.

Budget:

Our allocated budget for the initial batch is approximately \$50,000 - \$60,000.

Submission Criteria:

Please provide your proposal, including specific product recommendations and pricing, within 48 hours.
